SUMMARY

MERN Stack Developer with strong knowledge of MongoDB, Express.js, React.js, and Node.js. Experienced in building responsive and scalable full-stack web applications. Skilled in RESTful API development, JavaScript, and modern frontend technologies. Passionate about writing clean code, solving problems, and delivering efficient web solutions

EXPERIENCE

4 Months

- Developed a web-based customer support ticketing system used by support agents and managers to handle customer issues raised through multiple channels such as web forms and email.
- Implemented features that allow users to create tickets, assign priority, track ticket status, and manage resolution timelines efficiently.
- Enabled support managers to monitor agent workload and ticket aging through interactive dashboards.
- Integrated the application with backend services using REST APIs to fetch and update ticket data in near real
- Optimized the system to support high-volume daily usage, ensuring reliable performance and smooth issue management
- Roles and Responsibilities: Developed reusable React components for ticket creation, listing, and detailed views Integrated REST APIs to create, update, and track ticket status in real time Implemented priority indicators, status badges, and conditional rendering Designed responsive layouts using Tailwind CSS for agent and manager views Managed loading states, error handling, and empty data scenarios Worked closely with backend and QA teams to validate ticket workflows.

6 Months

- Designed and implemented user-friendly interfaces using React.js and JavaScript (ES6).
- Converted UI/UX designs into pixel-perfect, responsive web pages using HTML5 and CSS3.
- Applied Tailwind CSS, Flexbox, and Grid to create clean and scalable layouts.
- Worked on improving application performance and page load time.
- Integrated APIs and managed state-driven UI updates.
- Ensured cross-browser compatibility and accessibility standards.
- Participated in code reviews and followed frontend best practices.
- Roles and Responsibilities: Developed content listing, editor, and publishing workflows Integrated REST APIs for content CRUD operations Implemented role-based access for editors and admins Built responsive admin layouts using Tailwind CSS Ensured UI consistency and usability for non-technical users.
- Developed a Corporate Learning Management System (LMS) for employees to access training courses and learning resources.
- Implemented features to track individual learning progress and course completion status.
- Built assessment modules to enable users to complete quizzes and evaluations online.
- Designed manager dashboards to monitor team progress, completion rates, and performance metrics.
- Integrated backend services using REST APIs to fetch course content, user progress, and certification data.
- Ensured seamless data flow between frontend and backend systems for real-time updates. Roles and Responsibilities: Developed course listing, course detail, and progress tracking components. Integrated REST APIs for course data and user progress.
- Implemented responsive UI for learners and managers.
- Built reusable components for quizzes and assessments Handled loading states, error handling, and empty content scenarios.

PROJECT

Kanban Board-(Task Management Application)

- Developed a Kanban-style task management application using React JS and Tailwind CSS with a responsive multi-column layout (To Do, In Progress, Done).
- Implemented drag-and-drop functionality using a DnD library to seamlessly move tasks between columns with real-time UI updates.
- Managed global state using React Context API (use Context) along with use State and use Effect for efficient and scalable state handling.
- Integrated local Storage to persist task data, ensuring user progress is maintained even after page reload.
- Built features to create, edit, delete, and view tasks in a modal, supporting enhanced task organization and usability.

Notes App-(TODO application)

- Developed a responsive To-Do Application using React JS and Tailwind CSS to manage daily tasks efficiently.
- Implemented features to add, edit, delete, and mark tasks as completed with dynamic UI updates.
- Utilized React Hooks (use State, use Effect) for efficient state management and component lifecycle handling.
- Integrated local Storage to persist and maintain data after page refresh.
- Designed reusable components with a clean, user-friendly interface to enhance usability and performance.

Movie searching app

- Integrated the OMDb API for real-time movie search, pagination, and API-based filtering.
- Implemented dynamic routing using React Router to display detailed movie information including poster, genre, plot, ratings, and cast.
- Developed favorites management with persistent state handling for improved user experience.
- Designed a fully responsive and modern UI using Tailwind CSS.
- Implemented comprehensive error handling and clean, modular code structure for scalability and maintainability.

Express Book Reviews

- Built backend APIs for users to add, update, and review books.
- Implemented JWT authentication for secure login and role-based actions.
- Added pagination and altering for efficient data retrieval and smooth UI experience.
- Improved API speed by optimizing database queries using lean operations.
- Designed a structured backend following MVC architecture.
- Tested functionality using sample datasets and load testing.

Authentication & Authorization Using MERN Stack

- Implemented secure Forgot & Reset Password functionality using Node.js and Express.js
- Designed token-based password reset system using JWT for secure authentication
- Integrated email verification flow for user password recovery
- Used bcrypt for password hashing and secure credential storage in MongoDB
- Developed RESTful APIs for authentication and user management
- Ensured secure and user-friendly password reset workflow with proper validation.

EDUCATION

B.E/B.tech

Vignan's Institute Of Information Technology • 2024

Intermediate

Sri Chaitanya Junior College • 2020

AWARDS & HONORS

Ranked in the Top 400 among thousands of participants in the GeeksforGeeks 21-Day Coding Challenge (2024, powered by Deutsche Bank)

- demonstrating exceptional problem-solving skills in Data Structures & Algorithms.

SKILLS

MongoDB, Express.js, React.js, Node.js

HTML5, CSS/CSS3, JavaScript, ES6 Features

Tailwind CSS

Flexbox and CSS Grid, Responsive web designing

Git and Github, VS code,," NPM, Figma, postman
